How many miles are there of coastal roads in the US?
(Coastal roads defined as roads at least occasionally exposed to coastal waves and surge. Includes estuaries, not just open coast.)

a. 1,000  

b. 20,000  

c. 60,000  

d. 100,000
QUESTION

How many miles are there of coastal roads in the US?

(Coastal roads defined as roads at least occasionally exposed to coastal waves and surge. Includes estuaries, not just open coast.)

a. 1,000
b. 20,000
c. 60,000
d. 100,000

Research Gap: Nature-based Solutions and Integrated Approach

- Natural features
- Nature-based features
- Hybrid approaches
Program Overview

Nature-Based Solutions for Coastal Highway Resilience

• 5 pilot projects
  – OR DOT
  – ME & NH DOTs jointly
  – MS DOT
  – DE DOT
  – US Army Corps of Engineers in NJ

• White paper
• Regional peer exchanges
• Implementation Guide
• Incorporated into HEC-25

Implementation Guide

• Goal: Provide info transportation agencies need to implement

• Overview
  – Technical factsheets
  – Benefits and typical costs
  – Implementation considerations

What Makes Highway Agencies Adopt Living Shorelines?

- Opportunity to meet multiple goals
  - Protect road
  - Protect surrounding community
  - Habitat creation
  - Compensatory mitigation
- Evidence of wave, erosion, and flood reduction benefits; data on benefits and costs; examples; step by step guidance (see FHWA Implementation Guide!)
- Partnerships

Top: Project Green Shores, Pensacola, FL protects 1 mi segment of Bayfront Parkway. Constructed 2003. FL DEP led.

Left: Pocket beaches protect Water St in Yorktown, VA. York County lead. VDOT contributed funding. Constructed 1994.

Design and implement living shoreline (shellfish habitat, saltwater marsh) as part of reconstruction of Laguna Shores Road.

Partners:
- Corpus Christi Metropolitan Planning Organization
- FHWA
- Texas A&M University
- City of Corpus Christi Engineering Department
- HDR Engineering
